Chapter

ATTRIBUTE	TYPE	EXAMPLE
chapter_num	*Integer*	1
chapter_numeral	*String*	Chapter I
title	*String*	At midnight, all the agents...
quote	*String*	\"At midnight, all the agents and superhuman crew, go out and round up everyone who knows more than they do.\" -- Bob Dylan
doomsday_clock	*String*	11:48 PM
pages	*Array of page objects*	[{ }]

Page

The default page layout uses 9 panels. Set the `layout` attribute for pages that have a different panel layout (for example, 12).

The cover page should have a page entry with page_num set to 0.

The quote is usually on the last page of the chapter.

The chapter title is usually not on page 1, but a few pages later.

ATTRIBUTE	TYPE	EXAMPLE
page_num	*Integer*	24 (use 0 for the cover page)
layout	*Integer*	12 (default is 9)
panels	*Array of panel objects*	[{ }]

Panel

Panels are numbered based on their top-left position in the page grid, from the top left of the page, reading to the right. For a standard page, the panels are numbered 1-9.
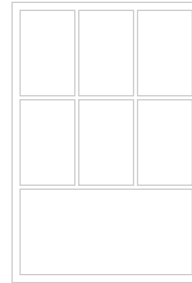

Example:

```
{
  "page_num": 10,
  "panels": [
    { "panel": 1 },
    { "panel": 2 },
    { "panel": 3 },
```

```
      { "panel": 4 },
      { "panel": 5 },
      { "panel": 6 },
      { "panel": 7 },
      { "panel": 8 },
      { "panel": 9 }
    ]
  }
```

In a 9-panel grid, if the third row appears as a single panel, the panels would be numbered 1-7 and panel 7 would have `width:3`.
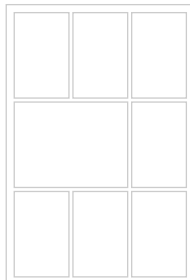

Example:

```
  {
    "page_num": 10,
    "panels": [
      { "panel": 1 },
      { "panel": 2 },
      { "panel": 3 },
      { "panel": 4 },
      { "panel": 5 },
      { "panel": 6 },
      { "panel": 7, "width": 3 }
    ]
  }
```

In a 9-panel grid, if the first panel in the second row (panel 4) has a width of 2, the next panel would be panel 6.

Example:

```
  {
    "page_num": 10,
```

```
    "panels": [
      { "panel": 1 },
      { "panel": 2 },
      { "panel": 3 },
      { "panel": 4, "width": 2 },
      { "panel": 6 },
      { "panel": 7 },
      { "panel": 8 },
      { "panel": 9 }
    ]
  }
```

In a 12-panel grid, if the first panel has a height of 2 (rows) and width of 4 (columns), that page would not have entries for panels 2-8.

Example:

```
  {
    "page_num": 6,
    "layout": 12,
    "panels": [
      { "panel": 1, "width": 4, "height": 2 },
      { "panel": 9 },
      { "panel": 10 },
      { "panel": 11 },
      { "panel": 12 }
    ]
  }
```

The panel numbers, width, and height are relative to the page layout.

ATTRIBUTE	TYPE	EXAMPLE
panel	*Integer*	3
width	*Integer*	3
height	*Integer*	2
chronology	*String*	present | past
rorschachs_journal	*Boolean*	true
rorschachs_journal_date	*String*	October 12th, 1985
characters	*Array of strings*	["dan_dreiberg", "laurie_juspeczyk"]

tags	*Array of strings*	["happy_face"]

Characters

List each character that appears in the panel. For characters with a real name and a hero name, use the appropriate name.

Available names:

```
the_comedian
edward_blake
rorschach
walter_kovacs
dr_manhattan
jon_osterman
ozymandias
adrian_veidt
nite_owl
dan_dreiberg
silk_spectre
laurie_juspeczyk
```

Rorschach   Nite Owl   Silk Spectre   Dr. Manhattan   Ozymandias   The Comedian
